

**PETITION REQUESTING FAIR AND REASONABLE TERMS IN THE STRGBA GSA'S REVISED GSP
July 2024**

The STRGBA Groundwater Sustainability Agency ("GSA") is preparing a revised Groundwater Sustainability Plan ("GSP") to address DWR's concerns. The Modesto Subbasin has four Management Areas: MID, OID, Non-District West ("NDW") and Non-District East ("NDE"). The STRGBA GSA's 2023 Annual Report describes the MID, OID and NDW Management Areas as contributing to groundwater *recharge*, while the *overdraft* in the NDE Management Area's *continues to increase*.

As a landowner in the Modesto Subbasin, I want to ensure that the revised GSP does not impose Management Actions or any financial burdens on the landowners in the MID, OID and NDW Management Areas and that the NDE Management Area is required to address the overdraft, as we have already historically paid for infrastructure and the costs to bring surface water into the Modesto Subbasin.

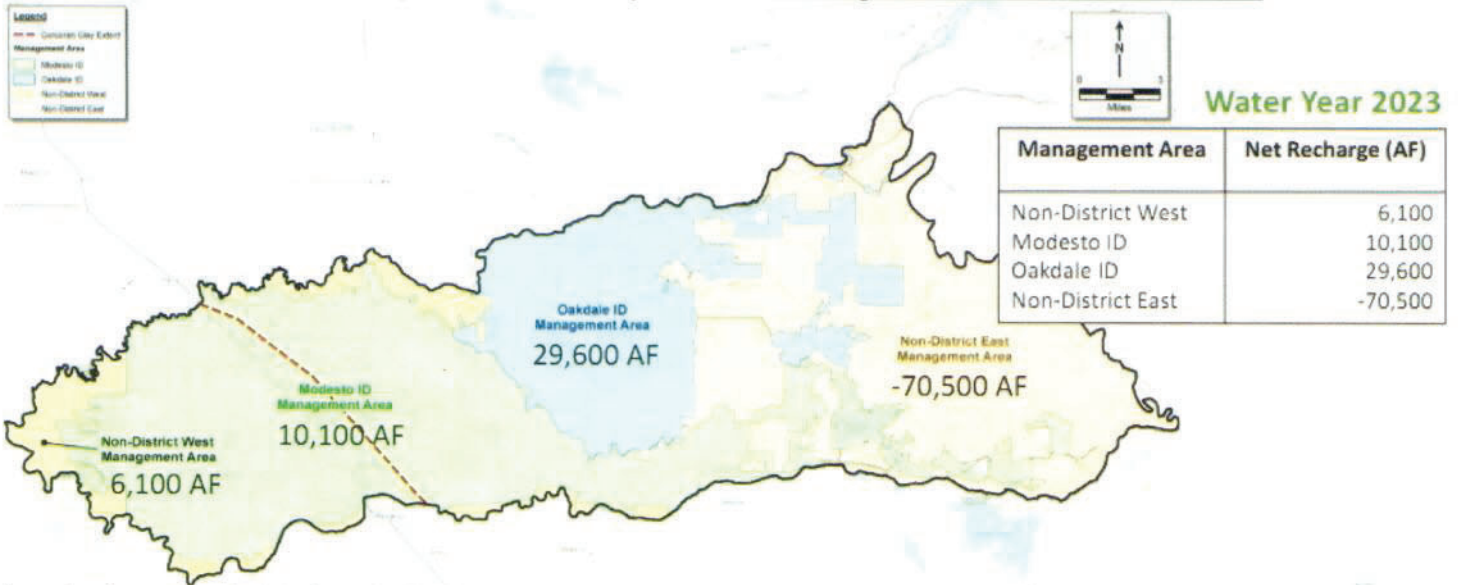

By signing below, I confirm that I am a landowner in the Modesto Subbasin and I overwhelmingly support and request that the STRGBA GSA include the following terms in the revised GSP:

- Costs. The costs associated with GSP implementation and operation of the GSA should not be divided evenly among landowners in all 4 Management Areas. To the extent that costs for Projects and/or Management Actions are not completely covered by grants, the NDE should be responsible. The landowners in the MID and OID Management Areas have already spent millions of dollars implementing a system of sustainable use of groundwater and should not have to fund any Projects or Management Actions necessitated by the overdraft in the NDE.
- Pumping Fees and Assessments. The MID, OID and NDW Management Areas should not be required to pay any Pumping Fees or Assessments.
- Participation in Management Actions. The MID, OID and NDW Management Areas should not be required to participate in any of the Management Actions. Any participation by the MID, OID and NDW Management Areas in any of the Management Actions should be voluntary.
